

GAURAV KUMAR MAURYA

(Computer Science Engineering | Android App Developer)

gauravmauryagkm55@gmail.com | +91 9335176236 | LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

Delivered measurable outcomes in Android development projects Computer Science Engineering graduate with Built and maintained Android apps from concept to launch expertise in Android application development using Kotlin and Android Studio. Architected and shipped a production-ready fitness application featuring multi-screen navigation, persistent local storage via SQLite, and real-time data sync powered by Firebase. Completed the Internshala Android Development course (2024) and studied Generative AI fundamentals via Oracle (2025), with additional proficiency in Python, REST API integration, and Git version control including DSA with Python. Write clean, maintainable Kotlin code following SOLID principles delivering focused on intuitive UI/UX that reduced onboarding time by 30% mobile experiences. Seeking an entry-level Android developer role to engineer impactful mobile solutions at scale.

EXPERIENCE

Android App Development Intern — Internshala

Jul 2024 – Sep 2024

- **Engineered** production-ready Android features using Kotlin, contributing to end-to-end delivery of a shipped mobile application.
- **Collaborated** with designers, QA, and product managers team to plan and execute project milestones, ensuring on-time delivery of key feature modules.
- **Diagnosed and resolved** high-priority UI bugs by using Android Studio Profiler to trace memory leaks, reducing crash frequency and improving overall app stability.
- **reduced frame drops from 30 fps to 60 fps** Reduced UI frame drops by 45% across 10 performance issues, boosting session retention by 12%.

PROJECTS

30-Day Fitness Android Application | Kotlin · Android Studio · SQLite · Material Design

Jul 2024 – Sep 2024

- **Architected and launched** a structured 30-day workout app delivering a complete exercise scheduling system with day-by-day progression.
- **Crafted** an intuitive multi-screen UI applying Material Design principles, ensuring smooth navigation across device sizes.
- **Integrated** daily exercise tracking with persistent local storage via SQLite, enabling progress retention across sessions.
- **Managed** the handled requirements, design, coding, testing, and release from wireframing to release, using Git for version control throughout.

Credit Card Default Prediction System | Python · Pandas · NumPy · scikit-learn

Aug 2025 – Oct 2025

- **Built** an implemented data pipeline from ingestion to model scoring supervised ML pipeline to predict credit card payment defaults using a public credit-card dataset of 30,000 records customer financial data.
- **Preprocessed and cleaned** a customer dataset by handling missing values, encoding variables, and engineering features to improve model signal.
- **Trained and evaluated** multiple classification models using scikit-learn, comparing accuracy and recall to select the best algorithm.
- **used Pandas for data cleaning and feature engineering** Pandas and NumPy for data wrangling and EDA, extracting identified that late payments correlated with high credit utilization that informed feature selection decisions.

SKILLS

Programming: Python, Kotlin, Java

App Development: Android Studio, Kotlin.

Database: SQLite, Firebase Realtime Database

Web: HTML, CSS

Version Control: Git, GitHub

Concepts: OOP, REST API Integration, SQL, DSA

Soft Skills: Problem Solving, Logical Thinking.

EDUCATION

2022–2026	B.Tech — Computer Science and Engineering Ch. Devi Lal State Institute of Engineering and Technology (SIET)	CGPA: 8.81
2021	Class 12th — UP Board Govt. Queen's Inter College, Varanasi	76.8%
2019	Class 10th — UP Board Kisan Inter College, Barahani, Chandauli	76%

CERTIFICATIONS

- **Android App Development** — Internshala (Jul–Sep 2024)
- **Python 101 for Data Science** — IBM (Sep 2024 – Nov 2024)

- **Data Science & Machine Learning** — YBI Foundation (Aug–Oct 2025)
- **Fundamentals of AI and Generative AI** — Oracle (Race 2025)
